FUND MANAGER'S REPORT

Expectations of a slowing US economy and renewed concerns over the sovereign debt crisis in Europe triggered a global sell off in equity markets worldwide, resulting in an unexpected volatility and risk aversion for the month. While the local equity market was not spared from the market correction, the local market (together with other key ASEAN markets) remained resilient as the PSEI closed at 4,348.50, a decline of only 3.44% versus its regional and global counterparts which declined by as much as 7%-10% for the same period. As such, the Fund Manager expects the equity market to remain volatile in the near term, with the PSEI to range between 4,100 to 4,350 while still maintaining the year-end target at 4,600-4,800. The Fund Manager has gradually reduced exposure in equities by taking profits on some positions and is now looking for opportunities to reposition on market dips or when improvements are seen in global market sentiments. Also, domestic fundamentals remain intact as the 2Q corporate results have been an improvement to the weak 1Q numbers particularly on the banking and property sector.
