Press Release

BDO's Q1 2011 net profit rises 18% to P2.44 billion

Banco De Oro Unibank, Inc. (BDO) posted an unaudited net profit of P2.44 billion in the first quarter of 2011, up 18-percent from P2.07 billion in the same period last year.

The growth was a result of the Bank's diversified revenue stream and tempered growth in operating expenses and conservative provisioning.

Net interest income rose 2 percent year-on-year to P8.5 billion with the expansion in earning assets and lower funding costs. Gross customer loans grew 16 percent year-on-year to P542.3 billion across all customer segments. Total deposits were up 10 percent to P746.2 billion, driven mainly by low-cost deposits generated from an expanded branch network.

Non-interest income increased 25 percent to P5.4 billion. Fee-based service income grew 17 percent to P3 billion on strong results from trust, private banking, remittance, transaction banking, insurance, investment banking, and credit cards. Trading and foreign exchange gains from treasury activities expanded 44 percent to P1.8 billion as market conditions remained favorable.

BDO was able to effectively manage its cost base as operating expenses increased only moderately by 4 percent to P8.8 billion. It continued to boost provisions by 27 percent year-on-year to P2.1 billion, bringing its non-performing loan (NPL) coverage ratio to 100 percent from 92 percent in the prior quarter and 83 percent as of the first quarter of 2010, even as NPL levels remained stable.

Capital Adequacy Ratio (CAR), meanwhile, remained healthy at 14 percent while the annualized Return on average Common Equity settled at 11.4 percent in the first quarter of 2011.
