The Fund's benchmark is the Philippine Stock Exchange Composite Index (PSEi).

A client profiling process should be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

- The BDO Institutional Equity Fund is primarily suitable for entities with balanced risk tolerance and with trust and fiduciary accounts and investment management accounts with the Trustee or its subsidiaries who are tax-exempt and whose tax-exemptions are supported by Bureau of Internal Revenue (BIR) tax-exemption certificates who seek potentially higher return through stock market investments but are also aware of the possibility of capital losses that such investments may entail.
- Participants/trustors are recommended to stay invested in the Fund for more than three (3) years. The Fund is not suitable for short-term investing.

OTHER DISCLOSURES**OUTLOOK AND STRATEGY**

The PSEi ended June at 6,364.94 with a slight gain of 23 points or just 0.37% for the month. The biggest concern faced in June was the Israel-Iran conflict pushing world oil prices higher while the Philippine peso weaker. Oil prices spiked more than 6% following the attack of Israel on Iran. Also, the peso negatively reacted and hovered above Php57.50 from sub Php55.50 level in May. Investors turned cautious as geopolitical risk weighed heavily on sentiment. The mood improved and was more upbeat towards end June due to a handful of good news. Oil prices fell alongside the rebound in the peso largely driven by easing geopolitical tensions in the Middle East. This helped the Index recover from a low of 6,200 to above 6,300 level. The low inflation print in June at 1.4% and BSP's move to cut the policy rates by 25 basis points to 5.25% have also perked up buying interest in the market. This led the Property sector to rally 8.20% m/m on lower policy rates. Effective July 1, investors will enjoy a lower stock transaction tax to 0.10% from 0.60% through the CMEPA (Capital Markets Efficiency Promotions Act) law. The new law was created to boost trading activity in the local stock market.

INVESTMENT POLICY / PROSPECTIVE INVESTMENTS

The Fund may invest in exchange-listed equities and fixed income securities, deposits in the Trustee's bank or in other banks, securities issued or guaranteed by the Philippine Government or the BSP and tradable securities issued by any supranational entity. Subject to BSP guidelines and the Trustee's Trust Committee approval, the Fund may also avail of financial derivative instruments solely for the purpose of hedging risk exposures, as well as invest in other tradable investment outlets/categories as may be deemed suitable for the Fund.
