OTHER DISCLOSURES**OUTLOOK AND STRATEGY**

The Philippine Stock Exchange Index (PSEi) rebounded in July, gaining 3.3% month-on-month to close at 6,236.44. The market maintained its footing above the 6,000 level as easing inflation provided support to investor sentiment, while bargain hunting emerged in select large-cap stocks that had previously underperformed. Foreign investors also returned as net buyers, reflecting a rotation away from AI-driven technology trades toward undervalued and lagging markets such as the Philippines. Approximately US\$67 million in net inflows was recorded during the month.

Another notable development during the month was the PSEi's August rebalancing, which was implemented at the end of July. Maynilad Water Services (MYNLD) replaced Converge ICT Solutions (CNVRG) in the benchmark index. In addition, the Philippine Stock Exchange announced revisions to its index methodology, including reduced free-float requirements and updated liquidity screening measures aimed at enhancing sector representation and overall investability.

INVESTMENT POLICY / PROSPECTIVE INVESTMENTS
