## INVESTMENT OBJECTIVE AND STRATEGY

The Fund aims for long-term capital appreciation by substantially investing in listed companies which the Trustee believes to exhibit good environmental, social and governance (ESG) practices. The Fund's benchmark is the Philippine Stock Exchange Composite Index (PSEi). "Environmental, social and governance" (ESG) refers to the three main areas of consideration as key factors in measuring the sustainability and ethical impact of an investment in a company or business. Within these areas are a broad set of concerns increasingly included in the non-financial factors that figure in the determination of a universe of investible outlets. ESG is the catch-all term for the criteria used in what has become known as socially responsible investing.

## CLIENT SUITABILITY

A client profiling process should be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

- ♦The BDO ESG Equity Fund is primarily suitable for individual and corporate investors with balanced risk appetite and who seek potentially higher returns through stock market investments but are also aware of the possibility of capital losses that such investments may entail.
- ♦Participants/trustors are recommended to stay invested in the Fund for more than three (3) years.

## OUTLOOK AND STRATEGY

The month of November was a roller coaster ride for the local equities market. The PSEi fell to as low of 5,500 level, hitting a 52-week low mid-month. The lingering flood control corruption issue coupled with the soft macro data and 3rd quarter corporate earnings weighed heavily on market sentiment. The release of the 3rd quarter GDP at 4.0% which missed the 5.2% consensus estimate, drove investors particularly foreign to reduce their equity positions. However, when the market reached crisis-level valuations, investors, mostly local buyers, started bargain-hunting and lifted the market to above 6,000 to close at 6,022.24. The peso was relatively stable, trading between Php58.60 – Php59.20/USD\$ which also helped support the buying activity. After four months of negative returns, the PSEi gained 1.56% in November. The month also saw the listing of Maynilad at an offer price of Php15.00 per share. The share price briefly fell below the IPO price but managed to bounce back above Php15 level. Telcos, CNVRG (+22.26% m/m) and TEL (+15.36% m/m) were among the top gainers after some clarity in Konektadong Pinoy Act. In terms of foreign flows, ICT (+2.36% m/m) remained the top foreign bought followed by RCR (+5.19% m/m).

## INVESTMENT POLICY / PROSPECTIVE INVESTMENTS

The Fund may invest in exchange-listed equities and fixed income securities, deposits in the Trustee's bank or in other banks, securities issued or guaranteed by the Philippine Government or the BSP and tradable securities issued by any supranational entity. Subject to BSP guidelines and the Trustee's Trust Committee approval, the Fund may also avail of financial derivative instruments solely for the purpose of hedging risk exposures, as well as invest in other tradable investment outlets/categories as may be deemed suitable for the Fund.
