**INVESTMENT OBJECTIVE AND STRATEGY**

The Fund aims to achieve capital appreciation by investing in a diversified portfolio of peso denominated short to long-term fixed income securities, equity securities, and other allowable investments for UITFs. The allocation for equity securities shall not exceed 80% of the total portfolio of the Fund. The Fund's benchmark is 50% Philippine Stock Exchange Composite Index (PSEi) and 50% Markit iBoxx ALBI Philippines 1-5 (Domestic) Index (IBXXPH15).

**CLIENT SUITABILITY**

A client profiling process should be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

- ♦The BDO Peso Multi-Asset Fund is primarily suitable for individual and corporate investors with balanced risk appetite and who are aware of the opportunity for high yields that portfolios with stock market investments may provide but are also knowledgeable of the possibility of capital losses that such investments may entail.
- ♦Participants/trustors are recommended to stay invested in the Fund for more than three (3) years.

**KEY RISKS AND RISK MANAGEMENT**

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

**Interest Rate Risk.** This is the possibility for an investor to experience losses due to changes in interest rates. The purchase and sale of a debt instrument may result in profit or loss because the value of a debt instrument changes inversely with prevailing interest rates.

**Market/Price Risk.** This is the possibility for an investor to experience losses due to changes in market prices of securities. It is the exposure to the uncertain market value of a portfolio due to price fluctuations.

**Liquidity Risk.** This is the possibility for an investor to experience losses due to the inability to sell or convert assets into cash immediately or in instances where conversion to cash is possible but at a loss.

**Credit Risk/Default Risk.** This is the possibility for an investor to experience losses due to a borrower's failure to pay the principal and/or interest in a timely manner on instruments such as bonds, loans, or other forms of security, which the borrower issued.

**Reinvestment Risk.** This is the risk associated with the possibility of having lower returns or earnings when maturing funds or the interest earnings of funds are reinvested.

For the Fixed Income portfolio, the Fund employs a risk management policy based on modified duration. Modified duration measures the sensitivity of bond prices to interest rate movements. As interest rates rise, bond prices fall. The higher the duration, the more the NAVPU will fluctuate in relation to changes in interest rates. All the Fund's investment outlets undergo evaluation in accordance with the Trustee's Investment Policy Manual. Regulatory exposure limits are monitored on a regular basis. The Fund may also use financial derivative instruments solely for the purpose of hedging risk exposures.

- ♦THE UIT FUND IS A TRUST PRODUCT AND NOT A DEPOSIT ACCOUNT, AND IS NOT INSURED BY THE PHILIPPINE DEPOSIT INSURANCE CORPORATION (PDIC).
- ♦RETURNS CANNOT BE GUARANTEED AND HISTORICAL NAVPU IS FOR ILLUSTRATION OF NAVPU MOVEMENTS/FLUCTUATIONS ONLY.
- ♦WHEN REDEEMING, THE PROCEEDS MAY BE WORTH LESS THAN THE ORIGINAL INVESTMENT AND ANY LOSSES WILL BE SOLELY FOR THE ACCOUNT OF THE CLIENT.
- ♦THE TRUSTEE IS NOT LIABLE FOR ANY LOSS UNLESS UPON WILLFUL DEFAULT, BAD FAITH OR GROSS NEGLIGENCE.

### OUTLOOK AND STRATEGY

The local equities market remained under pressure during the month, weighed down by escalating tensions from the US Iran conflict and the resulting volatility in global oil prices. For April, the PSEi declined by 1.9% m/m to close at 5,833.64. Investor sentiment stayed cautious, driven by rising inflation, currency weakness, and a more hawkish stance from the BSP. The market saw a brief relief rally, with the Index temporarily surpassing the 6,000 level after news of a potential ceasefire between the US and Iran. However, continued uncertainty surrounding the geopolitical situation quickly dampened sentiment and reversed gains.

Corporate earnings releases for the first quarter were generally soft, reflecting the adverse impact of elevated oil prices on costs and consumer demand. Notably, Ayala Land and SM Prime reported weaker-than-expected results, weighed down by slower residential revenues and higher sales cancellations. Overall, risk aversion remained pronounced, with the market recording net foreign outflows of \$209 million for the month.

The Philippine CPI for March surged to 4.1%, significantly higher than the market consensus and previous month's report at 3.8% and 2.4%, respectively, mainly driven by the effects of the Middle East conflict on transport and fuel prices. In their second policy meeting this year, the BSP raised the policy rate by 25bps from 4.25% to 4.50%, citing that this month's print hit above their 2-4% target range. As the fund continues to take advantage of elevated interest rates, majority of the fund's investments are in government securities with a strong preference for liquid benchmark issuances.

### INVESTMENT POLICY / PROSPECTIVE INVESTMENTS

The Fund may invest in exchange-listed equities and fixed income securities, deposits in the trustee's bank or in other banks, securities issued or guaranteed by the Philippine Government or the BSP and tradable securities issued by any supranational entity. Subject to BSP guidelines and the Trustee's Trust Committee approval, the Fund may also avail of financial derivative instruments solely for the purpose of hedging risk exposures, as well as invest in other tradable investment outlets/categories as may be deemed suitable for the Fund.
