The allocation for equity securities shall not exceed 80% of the total portfolio of the Fund. The Fund's benchmark is 50% Philippine Stock Exchange Composite Index (PSEi) and 50% Markit iBoxx ALBI Philippines 1-5 (Domestic) Index (IBXXPH15).

CLIENT SUITABILITY

A client profiling process should be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

- ♦The BDO Peso Multi-Asset Fund is primarily suitable for individual and corporate investors with balanced risk appetite and who are aware of the opportunity for high yields that portfolios with stock market investments may provide but are also knowledgeable of the possibility of capital losses that such investments may entail.
- ♦Participants/trustors are recommended to stay invested in the Fund for more than three (3) years.

KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Interest Rate Risk. This is the possibility for an investor to experience losses due to changes in interest rates. The purchase and sale of a debt instrument may result in profit or loss because the value of a debt instrument changes inversely with prevailing interest rates.

Market/Price Risk. This is the possibility for an investor to experience losses due to changes in market prices of securities. It is the exposure to the uncertain market value of a portfolio due to price fluctuations.

Liquidity Risk. This is the possibility for an investor to experience losses due to the inability to sell or convert assets into cash immediately or in instances where conversion to cash is possible but at a loss.

Credit Risk/Default Risk. This is the possibility for an investor to experience losses due to a borrower's failure to pay the principal and/or interest in a timely manner on instruments such as bonds, loans, or other forms of security, which the borrower issued.

Reinvestment Risk. This is the risk associated with the possibility of having lower returns or earnings when maturing funds or the interest earnings of funds are reinvested.

For the Fixed Income portfolio, the Fund employs a risk management policy based on modified duration. Modified duration measures the sensitivity of bond prices to interest rate movements. As interest rates rise, bond prices fall. The higher the duration, the more the NAVPU will fluctuate in relation to changes in interest rates. All the Fund's investment outlets undergo evaluation in accordance with the Trustee's Investment Policy Manual. Regulatory exposure limits are monitored on a regular basis. The Fund may also use financial derivative instruments solely for the purpose of hedging risk exposures.

- ♦THE UIT FUND IS A TRUST PRODUCT AND NOT A DEPOSIT ACCOUNT, AND IS NOT INSURED BY THE PHILIPPINE DEPOSIT INSURANCE CORPORATION (PDIC).
- ♦RETURNS CANNOT BE GUARANTEED AND HISTORICAL NAVPU IS FOR ILLUSTRATION OF NAVPU MOVEMENTS/FLUCTUATIONS ONLY.
- ♦WHEN REDEEMING, THE PROCEEDS MAY BE WORTH LESS THAN THE ORIGINAL INVESTMENT AND ANY LOSSES WILL BE SOLELY FOR THE ACCOUNT OF THE CLIENT.
- ♦THE TRUSTEE IS NOT LIABLE FOR ANY LOSS UNLESS UPON WILLFUL DEFAULT, BAD FAITH OR GROSS NEGLIGENCE.

OUTLOOK AND STRATEGY

The PSEi ended June at 6,364.94 with a slight gain of 23 points or just 0.37% for the month. The biggest concern faced in June was the Israel-Iran conflict pushing world oil prices higher while the Philippine peso weaker. Oil prices spiked more than 6% following the attack of Israel on Iran. Also, the peso negatively reacted and hovered above Php57.50 from sub Php55.50 level in May. Investors turned cautious as geopolitical risk weighed heavily on sentiment. The mood improved and was more upbeat towards end June due to a handful of good news. Oil prices fell alongside the rebound in the peso largely driven by easing geopolitical tensions in the Middle East. This helped the Index recover from a low of 6,200 to above 6,300 level. The low inflation print in June at 1.4% and BSP's move to cut the policy rates by 25 basis points to 5.25% have also perked up buying interest in the market. This led the Property sector to rally 8.20% m/m on lower policy rates. Effective July 1, investors will enjoy a lower stock transaction tax to 0.10% from 0.60% through the CMEPA (Capital Markets Efficiency Promotions Act) law. The new law was created to boost trading activity in the local stock market.

On the local bond market space, yields moved sideways to downward bias as bond traders anticipated BSP's rate cut. Although, yields saw an uptick in the belly of the curve to long term rates due to the escalating geopolitical tension in the Middle East. However, in the final week of June local yields rallied following the sharp drop in oil prices on easing conflict which alleviated inflationary fears. On the macro front, headline inflation in June was registered at 1.4%, slightly above May's 1.3% print but slower than the 3.7% print a year ago. The sustained low food and electricity prices kept inflation way below the BSP's target range of 2.0% - 4.0% for 2025. This gives the BSP room to continue its easing cycle for 2025.

INVESTMENT POLICY / PROSPECTIVE INVESTMENTS

The Fund may invest in exchange-listed equities and fixed income securities, deposits in the trustee's bank or in other banks, securities issued or guaranteed by the Philippine Government or the BSP and tradable securities issued by any supranational entity. Subject to BSP guidelines and the Trustee's Trust Committee approval, the Fund may also avail of financial derivative instruments solely for the purpose of hedging risk exposures, as well as invest in other tradable investment outlets/categories as may be deemed suitable for the Fund.
