KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Interest Rate Risk. This is the possibility for an investor to experience losses due to changes in interest rates. The purchase and sale of a debt instrument may result in profit or loss because the value of a debt instrument changes inversely with prevailing interest rates.
Market/Price Risk. This is the possibility for an investor to experience losses due to changes in market prices of securities. It is the exposure to the uncertain market value of a portfolio due to price fluctuations.
Liquidity Risk. This is the possibility for an investor to experience losses due to the inability to sell or convert assets into cash immediately or in instances where conversion to cash is possible but at a loss.
Credit Risk/Default Risk. This is the possibility for an investor to experience losses due to a borrower's failure to pay the principal and/or interest in a timely manner on instruments such as bonds, loans, or other forms of security, which the borrower issued.
Reinvestment Risk. This is the risk associated with the possibility of having lower returns or earnings when maturing funds or the interest earnings of funds are reinvested.

For the Fixed Income portfolio, the Fund employs a risk management policy based on modified duration. Modified duration measures the sensitivity of bond prices to interest rate movements. As interest rates rise, bond prices fall. The higher the duration, the more the NAVPU will fluctuate in relation to changes in interest rates. All the Fund's investment outlets undergo evaluation in accordance with the Trustee's Investment Policy Manual. Regulatory exposure limits are monitored on a regular basis. The Fund may also use financial derivative instruments solely for the purpose of hedging risk exposures.

OUTLOOK AND STRATEGY

The local equities market declined sharply in September, with the PSEi closing at 5,679.48, down 4.65% month-on-month and bringing its year-to-date loss to 6.17%. Investor sentiment was weighed down by rising global bond yields and renewed inflation concerns. Global bond markets experienced a broad sell-off during the month, pushing interest rates close to multi-year highs. Domestically, headline inflation accelerated to 7.2% in September from 6.1% in August, driven mainly by higher food prices, particularly rice and vegetables, following recent storms. Trading activity remained subdued as investors either raised cash or stayed on the sidelines ahead of the GCash IPO. Overall, the combination of a challenging macroeconomic environment and heightened uncertainty kept risk appetite muted throughout the month.

Local bond yields rose in September, reversing August's rally and closing the third quarter higher. Persistent geopolitical tensions in the Middle East, sticky inflation, a record-low peso of ₱62.65 per US dollar, and expectations of further central bank tightening kept investors defensive. The Bureau of the Treasury opted for a shorter 2.5-year retail bond, helping manage borrowing costs amid elevated rates. The bond was priced at a 6.875% coupon, with the government indicating a target issuance of approximately ₱150 billion in new money. Benchmark yields increased by an average of 36 bps in September. As the fund continues to take advantage of elevated interest rates, majority of the fund's investments are in government securities with a strong preference for liquid benchmark issuances, with small exposure in corporate bonds.

INVESTMENT POLICY / PROSPECTIVE INVESTMENTS

The Fund may invest in exchange-listed equities and fixed income securities, deposits in the trustee's bank or in other banks, securities issued or guaranteed by the Philippine Government or the BSP and tradable securities issued by any supranational entity. Subject to BSP guidelines and the Trustee's Trust Committee approval, the Fund may also avail of financial derivative instruments solely for the purpose of hedging risk exposures, as well as invest in other tradable investment outlets/categories as may be deemed suitable for the Fund.

The Fund's Declaration of Trust (DOT) provides that its Single Exposure Limit Policy is deemed amended should the BSP amend the exposure limit requirements of UITFs. Effective June 11, 2026, pursuant to BSP Circular 1234, the Fund's Single Exposure Limit Policy shall be as follows: "The combined exposure of the Fund to any entity shall not exceed 15% of the market value of the Fund: Provided, that the investment in exchange-traded equity securities shall be subject to a 20% exposure limit to a single entity/issuer; Provided, further, that any exposure exceeding 15% up to the applicable 20% limit, shall be solely in the form of investments in exchange-traded equity securities of the same entity/issuer."
