CLIENT SUITABILITY

A client profiling process should be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

- ♦The BDO Peso Bond Fund is primarily suitable for: (Retail Class) Individual and corporate investors with moderate risk appetite and who are looking for higher yields and are willing to take the attendant risks that come with portfolios that may have investments with longer tenors; (Merit Class) Retirement Plans with existing investment management (IMA) or trust and other fiduciary accounts (TA) with the Trustee or its subsidiaries.
- ♦Participants/trustors are recommended to stay invested in the Fund for at least three (3) years.

KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Interest Rate Risk. This is the possibility for an investor to experience losses due to changes in interest rates. The purchase and sale of a debt instrument may result in profit or loss because the value of a debt instrument changes inversely with prevailing interest rates.

Market/Price Risk. This is the possibility for an investor to experience losses due to changes in market prices of securities. It is the exposure to the uncertain market value of a portfolio due to price fluctuations.

Liquidity Risk. This is the possibility for an investor to experience losses due to the inability to sell or convert assets into cash immediately or in instances where conversion to cash is possible but at a loss.

Credit Risk/Default Risk. This is the possibility for an investor to experience losses due to a borrower's failure to pay the principal and/or interest in a timely manner on instruments such as bonds, loans, or other forms of security, which the borrower issued.

Reinvestment Risk. This is the risk associated with the possibility of having lower returns or earnings when maturing funds or the interest earnings of funds are reinvested.

The Fund employs a risk management policy based on modified duration. Modified duration measures the sensitivity of bond prices to interest rate movements. As interest rates rise, bond prices fall. The higher the duration, the more the NAVPU will fluctuate in relation to changes in interest rates. All the Fund's investment outlets undergo evaluation in accordance with the Trustee's Investment Policy Manual. Regulatory exposure limits are monitored on a regular basis. The Fund may also use financial derivative instruments solely for the purpose of hedging risk exposures.

- ♦THE UIT FUND IS A TRUST PRODUCT AND NOT A DEPOSIT ACCOUNT, AND IS NOT INSURED BY THE PHILIPPINE DEPOSIT INSURANCE CORPORATION (PDIC).
- ♦RETURNS CANNOT BE GUARANTEED AND HISTORICAL NAVPU IS FOR ILLUSTRATION OF NAVPU MOVEMENTS/FLUCTUATIONS ONLY.
- ♦WHEN REDEEMING, THE PROCEEDS MAY BE WORTH LESS THAN THE ORIGINAL INVESTMENT AND ANY LOSSES WILL BE SOLELY FOR THE ACCOUNT OF THE CLIENT.
- ♦THE TRUSTEE IS NOT LIABLE FOR ANY LOSS UNLESS UPON WILLFUL DEFAULT, BAD FAITH OR GROSS NEGLIGENCE.
