OTHER DISCLOSURES

OUTLOOK AND STRATEGY

The stock market continued to languish in May on sustained foreign selling. The PSEi shed more than 300 points to close at 7,497. The index has seen 4 consecutive months of net foreign selling, depressing share prices of Index names such as AEV (-17.2% MoM); TEL (-11.5% MoM) and JGS (-10.7% MoM). Peso weakness and inflation worries continued to hound the market with the peso further depreciating by another 1.5% and inflation creeping to a 5-year high of 4.5%. The BSP finally raised its policy rate by 25 bps to 3.25% as a result. This was followed though by a cut in the reserve requirement by another 1% to 18%, releasing P90 billion of fresh money into the financial system and muddling up its monetary policy stance once again as the contradictory action sent mixed signals to the market. Investors, particularly the locals, remained on the sidelines once more. The market only saw an uptick in activity by month-end due to MSCI rebalancing. Expect the market to trade range-bound between 7,400 and 7,800 levels with downside of 7,200 on lack of market-moving news in the short term.

INVESTMENT POLICY / PROSPECTIVE INVESTMENTS

The Fund may invest in exchange-listed equities and fixed income securities, deposits in the Trustee's bank or in other banks, securities issued or guaranteed by the Philippine Government or the BSP and tradable securities issued by any supranational entity. Subject to BSP guidelines and the Trustee's Trust Committee approval, the Fund may also avail of financial derivative instruments solely for the purpose of hedging risk exposures, as well as invest in other tradable investment outlets/categories as may be deemed suitable for the Fund.
