INVESTMENT OBJECTIVE AND STRATEGY

The Fund aims to achieve capital appreciation by investing in a portfolio of equity securities and short to long term fixed-income securities. The allocation for equity securities shall be between 40% to 60% of the portfolio or any allocation range that may be prescribed by the Trust Officers Association of the Philippines (TOAP) in consultation with the regulatory authority/ies. The Fund's benchmark is 50% Philippine Stock Exchange Composite Index (PSEi) and 50% Markit iBoxx ALBI Philippines 1-5 (Domestic) Index (IBXXPH15).

CLIENT SUITABILITY

A client profiling process should be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

♦The BDO Peso Balanced Fund is primarily suitable for individual and corporate investors with balanced risk appetite and who are aware of the opportunity for high yields that portfolios with stock market investments may provide but are also knowledgeable of the possibility of capital losses that such investments may entail.

♦Participants/trustors are recommended to stay invested in the Fund for more than three (3) years.

KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Interest Rate Risk. This is the possibility for an investor to experience losses due to changes in interest rates. The purchase and sale of a debt instrument may result in profit or loss because the value of a debt instrument changes inversely with prevailing interest rates.

Market/Price Risk. This is the possibility for an investor to experience losses due to changes in market prices of securities. It is the exposure to the uncertain market value of a portfolio due to price fluctuations.

Liquidity Risk. This is the possibility for an investor to experience losses due to the inability to sell or convert assets into cash immediately or in instances where conversion to cash is possible but at a loss.

Credit Risk/Default Risk. This is the possibility for an investor to experience losses due to a borrower's failure to pay the principal and/or interest in a timely manner on instruments such as bonds, loans, or other forms of security, which the borrower issued.

Reinvestment Risk. This is the risk associated with the possibility of having lower returns or earnings when maturing funds or the interest earnings of funds are reinvested.

For the Fixed Income portfolio, the Fund employs a risk management policy based on modified duration. Modified duration measures the sensitivity of bond prices to interest rate movements. As interest rates rise, bond prices fall. The higher the duration, the more the NAVPU will fluctuate in relation to changes in interest rates. All the Fund's investment outlets undergo evaluation in accordance with the Trustee's Investment Policy Manual. Regulatory exposure limits are monitored on a regular basis. The Fund may also use financial derivative instruments solely for the purpose of hedging risk exposures.

♦THE UIT FUND IS NOT A DEPOSIT AND IS NOT INSURED BY THE PHILIPPINE DEPOSIT INSURANCE CORPORATION (PDIC).
 ♦RETURNS CANNOT BE GUARANTEED AND HISTORICAL NAVPU IS FOR ILLUSTRATION OF NAVPU MOVEMENTS/FLUCTUATIONS ONLY.
 ♦WHEN REDEEMING, THE PROCEEDS MAY BE WORTH LESS THAN THE ORIGINAL INVESTMENT AND ANY LOSSES WILL BE SOLELY FOR THE ACCOUNT OF THE CLIENT.
 ♦THE TRUSTEE IS NOT LIABLE FOR ANY LOSS UNLESS UPON WILLFUL DEFAULT, BAD FAITH OR GROSS NEGLIGENCE.

OTHER DISCLOSURES

OUTLOOK AND STRATEGY

The stock market ended the year on a high note soaring to a new record close of 8,558, resulting in a year-on-year gain of 25.1%. As expected, market sentiment turned bullish with the passage of the tax reform bill (TRAIN). Foreign investors quickly turned into aggressive buyers following a heavy sell-off in November. Clearly, the signing of the TRAIN into law proved to be the market catalyst. This is the first tax measure passed by the Duterte administration and is expected to generate at least P90 billion in new net revenues. Key provisions include the reduction in the personal income tax rates but higher taxes on fuel, tobacco and sugar-sweetened beverages. However, it turned out that 3-in-1 coffee is exempted from the higher sugar excise tax and auto prices after taxes are more manageable, benefitting Universal Robina Corporation's (URC) coffee segment and GT Capital Holdings, Inc.'s (GTCAP) Toyota business. The usual year-end window-dressing activity also helped lift the market to new highs. We expect more buying in the coming weeks with TRAIN's positive impact on the economy and the infrastructure program switching to higher gear. We maintain preference for banks, property and retail. While the stock market was trading at record highs, bond yields moved sideways as Bangko Sentral ng Pilipinas (BSP) kept its policy rates unchanged despite the US Fed rate hike. However, peso bond yields could move higher on rising inflation expectations given the increase in excise tax on fuel as well as speculation over higher government borrowings in the coming months.

INVESTMENT POLICY / PROSPECTIVE INVESTMENTS

The Fund may invest in exchange-listed equities and fixed income securities, deposits in the trustee's bank or in other banks, securities issued or guaranteed by the Philippine Government or the BSP and tradable securities issued by any supranational entity. Subject to BSP guidelines and the Trustee's Trust Committee approval, the Fund may also avail of financial derivative instruments solely for the purpose of hedging risk exposures, as well as invest in other tradable investment outlets/categories as may be deemed suitable for the Fund.
