## INVESTMENT OBJECTIVE AND STRATEGY

The Fund aims to provide a high level of income with preservation of principal and maintenance of liquidity by investing in a combination of short to long-term fixed-income securities. The Fund's benchmark is the Markit iBoxx ALBI Philippines 1-5 (Domestic) Index (IBXXPH15).

## CLIENT SUITABILITY

A client profiling process should be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

- The BDO Peso Bond Fund is primarily suitable for individual and corporate investors with moderate risk appetite and who are looking for higher yields and are willing to take the attendant risks that come with portfolios that may have investments with longer tenors.
- Participants/trustors are recommended to stay invested in the Fund for at least three (3) years.

## KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

**Interest Rate Risk.** This is the possibility for an investor to experience losses due to changes in interest rates. The purchase and sale of a debt instrument may result in profit or loss because the value of a debt instrument changes inversely with prevailing interest rates.

**Market/Price Risk.** This is the possibility for an investor to experience losses due to changes in market prices of securities. It is the exposure to the uncertain market value of a portfolio due to price fluctuations.

**Liquidity Risk.** This is the possibility for an investor to experience losses due to the inability to sell or convert assets into cash immediately or in instances where conversion to cash is possible but at a loss.

**Credit Risk/Default Risk.** This is the possibility for an investor to experience losses due to a borrower's failure to pay the principal and/or interest in a timely manner on instruments such as bonds, loans, or other forms of security, which the borrower issued.

**Reinvestment Risk.** This is the risk associated with the possibility of having lower returns or earnings when maturing funds or the interest earnings of funds are reinvested.

The Fund employs a risk management policy based on modified duration. Modified duration measures the sensitivity of bond prices to interest rate movements. As interest rates rise, bond prices fall. The higher the duration, the more the NAVPU will fluctuate in relation to changes in interest rates. All the Fund's investment outlets undergo evaluation in accordance with the Trustee's Investment Policy Manual. Regulatory exposure limits are monitored on a regular basis. The Fund may also use financial derivative instruments solely for the purpose of hedging risk exposures.

- THE UIT FUND IS NOT A DEPOSIT AND IS NOT INSURED BY THE PHILIPPINE DEPOSIT INSURANCE CORPORATION (PDIC).
- RETURNS CANNOT BE GUARANTEED AND HISTORICAL NAVPU IS FOR ILLUSTRATION OF NAVPU MOVEMENTS/FLUCTUATIONS ONLY.
- WHEN REDEEMING, THE PROCEEDS MAY BE WORTH LESS THAN THE ORIGINAL INVESTMENT AND ANY LOSSES WILL BE SOLELY FOR THE ACCOUNT OF THE CLIENT.
- THE TRUSTEE IS NOT LIABLE FOR ANY LOSS UNLESS UPON WILLFUL DEFAULT, BAD FAITH OR GROSS NEGLIGENCE.

**OTHER DISCLOSURES****OUTLOOK AND STRATEGY**

The elevated inflation levels in 2018 has put pressure on the BSP to raise its benchmark interest rate. CPI inflation at 4.3% for March and 4.5% for April have exceeded the 2%-4% range set by the BSP. However, the central bank has continually refused to tighten monetary policy in response and even seemingly done the opposite when it lowered its reserve requirement on bank deposits earlier this year. This has resulted in some uncertainty in financial markets and contributed to the weakening of the peso against the US dollar to the P52 level. These developments have pushed government bond yields upward for most tenors during the month of April as the market anticipated higher inflation in the near future. PBF's portfolio was rebalanced over the month and its duration as of the end of April was 2.73.

**INVESTMENT POLICY / PROSPECTIVE INVESTMENTS**

The Fund may invest in deposits in the trustee's bank or in other banks, securities issued or guaranteed by the Philippine Government or the BSP, tradable securities issued by any supranational entity and exchange-listed fixed income securities. Subject to BSP guidelines and the Trustee's Trust Committee approval, the Fund may also avail of financial derivative instruments solely for the purpose of hedging risk exposures, as well as invest in other tradable investment outlets/categories as may be deemed suitable for the Fund.
