**OTHER DISCLOSURES**

**OUTLOOK AND STRATEGY**

The market was generally volatile in the first month of the year starting strong on the first two weeks and reaching a high of 7,304.79. However, the momentum was not sustained amidst selling pressures bringing the PSEi to close at 6,612.12 or a 7.38% drop MoM. In terms of sector performance, Holdings (-8.32%) and Mining (-14.07%) posted the weakest returns while Services (-4.22%) and Financial (-4.79%) performed better relative to the other sectors. Fears over the new Covid-19 strain and concerns over the vaccine roll out plan dragged the Index lower to a level last seen back in November 2020. The month saw inflation rising to 4.2% and an inflation print of 3.5% YoY in December due to rising global oil and food prices. In addition, the worse than expected -8.3% GDP for 4Q20 along with the widening trade and budget deficits at Php1.36T for December weighed down on investors' sentiment. Given this backdrop, expect market to remain range bound as investors focus on the upcoming 4Q20 results. Positive catalysts to lift market performance are the early vaccine roll out and the ratification of CREATE Bill which aims to boost foreign direct investments by lowering corporate income taxes.

**INVESTMENT POLICY / PROSPECTIVE INVESTMENTS**

The Fund may invest in exchange-listed equities and fixed income securities, deposits in the Trustee's bank or in other banks, securities issued or guaranteed by the Philippine Government or the BSP and tradable securities issued by any supranational entity. Subject to BSP guidelines and the Trustee's Trust Committee approval, the Fund may also avail of financial derivative instruments solely for the purpose of hedging risk exposures, as well as invest in other tradable investment outlets/categories as may be deemed suitable for the Fund.
