## INVESTMENT OBJECTIVE AND STRATEGY

The Fund aims to preserve capital and generate income from low-risk fixed income securities with a portfolio weighted average life of not more than one (1) year. The Fund's benchmark is the 91-day T-Bill rates.

## CLIENT SUITABILITY

A client profiling process should be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

- ♦The BDO Peso Money Market Fund is primarily suitable for individual and corporate investors with moderate risk appetite and who are looking for safe and liquid investments with yields relatively higher than those of savings and time deposit accounts.
- ♦Participants/trustors are recommended to stay invested in the Fund for at least six (6) months.

## KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

**Interest Rate Risk.** This is the possibility for an investor to experience losses due to changes in interest rates. The purchase and sale of a debt instrument may result in profit or loss because the value of a debt instrument changes inversely with prevailing interest rates.

**Market/Price Risk.** This is the possibility for an investor to experience losses due to changes in market prices of securities. It is the exposure to the uncertain market value of a portfolio due to price fluctuations.

**Credit Risk/Default Risk.** This is the possibility for an investor to experience losses due to a borrower's failure to pay the principal and/or interest in a timely manner on instruments such as bonds, loans, or other forms of security, which the borrower issued.

**Reinvestment Risk.** This is the risk associated with the possibility of having lower returns or earnings when maturing funds or the interest earnings of funds are reinvested.

The Fund employs a risk management policy based on modified duration. Modified duration measures the sensitivity of bond prices to interest rate movements. As interest rates rise, bond prices fall. The higher the duration, the more the NAVPU will fluctuate in relation to changes in interest rates. All the Fund's investment outlets undergo evaluation in accordance with the Trustee's Investment Policy Manual. Regulatory exposure limits are monitored on a regular basis. The Fund may also use financial derivative instruments solely for the purpose of hedging risk exposures.

- ♦THE UIT FUND IS NOT A DEPOSIT AND IS NOT INSURED BY THE PHILIPPINE DEPOSIT INSURANCE CORPORATION (PDIC).
- ♦RETURNS CANNOT BE GUARANTEED AND HISTORICAL NAVPU IS FOR ILLUSTRATION OF NAVPU MOVEMENTS/FLUCTUATIONS ONLY.
- ♦WHEN REDEEMING, THE PROCEEDS MAY BE WORTH LESS THAN THE ORIGINAL INVESTMENT AND ANY LOSSES WILL BE SOLELY FOR THE ACCOUNT OF THE CLIENT.
- ♦THE TRUSTEE IS NOT LIABLE FOR ANY LOSS UNLESS UPON WILLFUL DEFAULT, BAD FAITH OR GROSS NEGLIGENCE.

## OUTLOOK AND STRATEGY

April consumer price inflation remained elevated, sustaining the trend in 2018, as it hit a 5-year high of 4.5%. Elevated inflation has been caused by rising costs of foodstuff and fuel triggered by the implementation of additional taxes on fuel and sugary drinks on top of higher global oil prices and an artificial shortage in rice supply since the start of the year. If not arrested, this could lead to second-round effects such as demands for higher wages and transportation fares. To curb the inflationary pressures, the BSP raised its key borrowing rate – rather belatedly – by 25 basis points to 3.25% during its May 10 meeting for the first time since 2014. Surprisingly, the BSP made another move before the end of the month, cutting its reserve requirement ratio (RRR) for bank deposits by one percentage point to 18% for implementation on June 1. This is the second reserve rate cut this year and tends to offset the contractionary effects of its policy rate hike in May as it infuses fresh money amounting to around P90 billion back into the system. The reserve requirement is the amount of money from deposits that banks must maintain as cash deposited with the BSP. Amidst these developments, most time deposit rates offered by commercial banks for 1-3 month placements saw an uptick to the 3.5% level. PMMF remains positioned in a mix of short- and long-term time deposits with a slight exposure in commercial fixed rate notes. As of the end of May, the fund's average life and duration were at 0.73 years.

## INVESTMENT POLICY / PROSPECTIVE INVESTMENTS

The Fund may invest in deposits in the trustee's bank or in other banks, securities issued or guaranteed by the Philippine Government or the BSP, tradable securities issued by any supranational entity and exchange-listed fixed income securities. Subject to BSP guidelines and the Trustee's Trust Committee approval, the Fund may also avail of financial derivative instruments solely for the purpose of hedging risk exposures, as well as invest in other tradable investment outlets/categories as may be deemed suitable for the Fund.
