OTHER DISCLOSURES

OUTLOOK AND STRATEGY

The stock market further slid to negative territory in March, down 5.85% MoM to close at 7,979. It has already declined 12% from the all-time high level of 9,058 in January 2018. Heavy foreign selling continued to dominate the market as most foreigners were selling index names. AC and BDO were almost 11% down MoM while DMC, AEV and JGS dropped by almost 13% MoM. AC was particularly weak among the index heavyweights as it shed 8% in a single day after Mitsubishi sold \$152M worth of shares at P934 per share. Rising inflation and the weak peso continued to play on the market's negative sentiment with inflation hitting 4.5% in February and the peso depreciating by 4.5% YTD. Recently, fears of a potential trade war between US and China have put more downward pressure on the market. Its implication to global trade is now a looming concern for investors. Given the headwinds, the PSEi is seen to trade in a narrow range between 7,800 and 8,100. Take advantage of sharp declines to pick up stocks with strong earnings visibility. Bank stocks are still in our radar.

INVESTMENT POLICY / PROSPECTIVE INVESTMENTS

The Fund may invest in exchange-listed equities and fixed income securities, deposits in the Trustee's bank or in other banks, securities issued or guaranteed by the Philippine Government or the BSP and tradable securities issued by any supranational entity. Subject to BSP guidelines and the Trustee's Trust Committee approval, the Fund may also avail of financial derivative instruments solely for the purpose of hedging risk exposures, as well as invest in other tradable investment outlets/categories as may be deemed suitable for the Fund.
