## OTHER DISCLOSURES

### OUTLOOK AND STRATEGY

The PSEi continued to inch higher in December closing the year at 7,466, gaining 1.3% m/m on improved inflation print coupled with a few year-end window dressing activities. Easing inflation pressure with CPI softening to 6% in November from 6.7% in October kept the market afloat. The expectation of further deceleration in inflation tempered the selling pressure in the market. No aggressive sell flows were seen and trading volume was generally light averaging P6 billion a day. However, full-year market performance was down 12.8%. Only a handful of stocks ended on positive territory in 2018 namely SMC (+31.7% y/y), FGEN (+17.5% y/y), MER (+15.6% y/y) and JFC (+15.3% y/y). Improving macro data (easing inflation, more stable currency, dovish US Fed rate outlook, and waning trade war fears) could see a boost in the local equity market.

### INVESTMENT POLICY / PROSPECTIVE INVESTMENTS

The Fund may invest in exchange-listed equities and fixed income securities, deposits in the Trustee's bank or in other banks, securities issued or guaranteed by the Philippine Government or the BSP and tradable securities issued by any supranational entity. Subject to BSP guidelines and the Trustee's Trust Committee approval, the Fund may also avail of financial derivative instruments solely for the purpose of hedging risk exposures, as well as invest in other tradable investment outlets/categories as may be deemed suitable for the Fund.
