GENERAL RISK WARNING

The price of securities can and does fluctuate, and any individual security may experience upward or downward movements, and may even become valueless. There is an inherent risk that losses may be incurred rather than profit made as a result of buying and selling securities. Past performance is not a guide to future performance. There is an extra risk of losing money when securities are bought from smaller companies. There may be a big difference between the buying price and the selling price of these securities.

An investor deals in a range of investments each of which may carry a different level of risk.

PRUDENCE REQUIRED

This risk disclosure does not purport to disclose all the risks and other significant aspects of investing in these securities. An investor should undertake his or her own research and study on the trading of securities before commencing any trading activity. He/She may request information on the securities and issuer thereof from the Commission which are available to the public.

PROFESSIONAL ADVICE

An investor should seek professional advice if he or she is uncertain of, or has not understood any aspect of the securities to invest in or the nature of risk involved in trading of securities specially those high risk securities.

RISK FACTORS

Portfolio Concentration Risks

As of December 31, 2013, 86.15% of the Company's leasing and financing portfolio consisted of exposure in firms in the following sectors: transportation and communication, manufacturing, trade, real estate, mining and quarrying and trade. The Company maintains a general policy of avoiding excessive exposure in any particular sector of the Philippine Economy. The Company actively seeks to increase its exposure in industry sectors which it believes possess attractive growth opportunities. Conversely, it actively seeks to reduce its exposure in industry sectors where growth potential is minimal. Although the Company's leasing and financing portfolio is composed of transactions with a wide variety of businesses, the results of operations and financial condition of the Company may be adversely affected by any downturn in these sectors as well as in the Philippine economy in general.

The Company is exposed to a variety of financial risk which results from both its operating and investing activities. The Company's risk management is coordinated in close cooperation with the Board of Directors, and focuses on actively securing the Company's short-to-medium-term cash flows by minimizing the exposure to financial markets.

The Company does not actively engage in the trading of financial assets for speculative purposes nor does it write options. The most significant financial risks to which the Company is exposed to are described below.

Risk Management

Risk management of the Company's credit, market, liquidity, and operational risks is an essential part of Company's organizational structure and philosophy. The risk management process is essentially a top-down process that emanates from the Board of Directors (the "Board"). The Board approves the overall institutional tolerance risk, including risk policies and risk philosophy of the Company.

In general risk management is handled by the Market and Liquidity Risk Management Unit. They are tasked to propose and recommend policies for market and liquidity risk management for approval by the Risk Management Committee and ensure that the market and liquidity risk taking activities are in alignment with the senior management's risk appetite. Also, they review and recommend the acceptable market risk and liquidity limits and validate pricing models and methodologies.

Foreign Currency Sensitivity

Most of the Company's transactions are carried out in the Philippine peso, its functional currency. Exposures to currency exchange rate on financial assets arise from an insignificant portion of the Company's leasing and financing portfolio, cash and cash equivalents and lease deposits which are denominated in US dollars.

Interest Rate Risk

The Company follows a prudent policy on managing its assets and liabilities so as to ensure that exposure to fluctuations in interest rates are kept within acceptable limits. The current composition of the Company's assets and liabilities results in significant negative gap positions for repricing periods under one (1) year. Consequently, the Company may be vulnerable to increases in market interest rates. However, in consideration of the substantial net interest margins between the Company's marginal funding cost and its interest-earning assets; and favorable lease and financing terms which allow the Company to reprice annually, and to reprice at anytime in response to extraordinary fluctuations in interest rates, the

Company believes that the adverse impact of any interest rate increase would be limited. In addition, during periods of declining interest rates, the existence of a negative gap position favorably impacts the Company.

Credit Risk

The Company manages credit risk by setting limits for individual borrowers, and groups of borrowers and industry segments. The Company maintains a general policy of avoiding excessive exposure in any particular sector of the Philippine economy.

Concentrations arise when a number of counter parties are engaged in similar business activities, or activities in the same geographic region, or have similar economic features that would cause their ability to meet contractual obligations to be similarly affected by changes in economic, political or other conditions. Concentrations indicate the relative sensitivity of the Company's performance to developments affecting a particular industry or geographic location.

Liquidity Risk

The primary business of financing companies entails the borrowing and re-lending of funds. Consequently, financing companies are subjected to substantial leverage, and may therefore be exposed to the potential financial risks that accompany borrowing.

The Company expects that its continued asset expansion will result in the higher funding requirements in the future. Like most financing companies in the Philippines, the Group does not have a license to engage in quasi-banking function, and as such, is precluded from engaging in deposit-taking activities. In addition, it is precluded under the General Banking Act from incurring borrowings from more than nineteen (19) lenders at any one time, which to some extent, restricts its access to the public debt markets.

The Company believes that it currently has adequate debt funding from banks, other financial institutions, and through the issuance of Short Term Commercial Papers (STCPs). The Company has a license from the SEC to issue P15 billion STCPs.

The Company manages its liquidity needs by carefully monitoring scheduled debt servicing payments for long-term financial liabilities as well as cash outflow due in a day-to-day business.

TAXATION

Relevant Tax Regulations

Among the significant provisions of the National Internal Revenue Code (NIRC) that apply to the Group are the following:

- a. The regular corporate income tax (RCIT) of 30% (effective January 1, 2009) is imposed on taxable income net of applicable deductions
- b. Fringe benefits tax of 32% is imposed on the grossed-up value of the benefits given by employers to their managerial and supervisory employees (this is a final tax to be paid by the employer);
- c. Minimum corporate income tax (MCIT) of 2% based on gross income, as defined under the Tax Code, is required to be paid at the end of the year starting on the fourth year from the date of registration with the

Bureau of Internal Revenue (BIR) whenever the RCIT is lower than the MCIT. On October 19, 2007, the BIR issued Revenue Regulation (RR) No. 12-2007 which requires the quarterly computation and payment of the MCIT beginning on the income tax return for the fiscal quarter ending September 30, 2007. This amended certain provisions of RR No. 9-98 which specifically provides for the computation of the MCIT at end of each taxable year. Thus, in the computation of the tax due for the taxable quarter, if the computed quarterly MCIT is higher than the quarterly normal income tax, the tax due to be paid for such taxable quarter at the time of filing the quarterly corporate income tax return shall be the MCIT which is 2% of the gross income as of the end of the taxable quarter.

d. Net operating loss carryover (NOLCO) can be claimed as deduction against taxable income within three years after NOLCO is incurred;

e. Effective July 2008, Republic Act 9504 was approved giving corporate taxpayers an option to claim itemized deduction or optional standard deduction (ODS) equivalent to 40% of gross sales. Once the option to use OSD is made, it shall be irrevocable for the taxable year for which the option was made;

f. The amount of interest expense allowed as income tax deduction is reduced by an amount equal to 33% of the interest income subjected to final tax.

g. October 2012, the BIR prescribed the rules on deductibility of depreciation expenses as it relates to purchase of vehicles and other related thereto, and input taxes allowed thereto through RR No. 12-2012. Leasing Products:

Finance Lease – A source of medium term financing for the acquisition of capital equipment and is ideal if you plan to keep the asset up to the end of the term. With just a low upfront cost, you can use the asset immediately.

Operating Lease – This refers to a short-term lease that does not permit the recovery of the investment by the lessor during the initial period of lease. It is an off-balance sheet transaction where rentals are recorded in the lessee's book as expense. The operating lease product is being offered by BDO Rental.

Direct Lease - The Company purchases an asset selected by a client from a supplier and leases it to the client. Through this lease arrangement, the client overcomes budgetary constraints, enhances efficiency in cash flow management through rental payments, and minimizes the required equity contribution for asset acquisition.

Sale-Leaseback - The Company purchases an asset from a client based on appraised value. The Company then "leases back" the asset to the client. This type of lease arrangement simultaneously provides liquidity to the client and continued use of the asset.

Financing Products:

Commercial Loan - The Company provides financing to a commercial client through a loan secured by a mortgage on the latter's equipment or real property. The company registered a 22% increase in net income to P377.8 million for the 9-months ending September 2014 as compared to P309.8 million for the same period in 2013.

Gross revenues for the period amounted P1.7 billion, an increase of 21% from P1.4 billion last year. This was due to the increase in operating lease bookings as well as the hike in volumes from financial leases. Overall, Loans & Other Receivable grew by 26% from last year.

Interest and financing charges for year-to-date September 2014 amounted to P338.3 million, mainly from financing charges on borrowings of P335.9 million. Increase was due to higher levels of Bills Payable, which funded the portfolio growth. The increase in bills payable resulted in higher taxes & licenses of P136.3 million, attributable to related documentary stamp taxes.

Provision for Impairment & Credit Losses stood at P75.0M, equal to last year's provision.

Occupancy and equipment related expenses as of September 2014 amounted to P377.8 million, an increase of P127.9 million or 51% from last year. The increase is related to costs from the acquisition of assets under operating leases.

Litigation/assets acquired expenses decreased by P11.7 million in 2014 owing to lower maintenance expenses on acquired assets.

Other expenses showed an increase of 25% from P19.0 million in 2013 to P23.7 million in 2014, consistent with the larger volume of new bookings year-on-year.

Total assets increased 24% year-on-year to P28.3 billion from P22.8 billion, due to the increase in net loans and other receivables. The Company's net lease portfolio went up by 19% or P2.1 billion while net non-lease portfolio increased by 37% or P2.8 billion. Property, Plant and Equipment-net increased by 49% or P574.8 million from P1.2 billion in 2013 as a result of increase in net leased assets of BDORI.

Cash & cash equivalents went down to P229.3 million from P317.3 million in 2013 due to the purchase of additional Available for Sale investment.

Investment properties-net went down to P126.8million in September from P362.2 million for the same period last year, brought about by disposal of acquired assets as well as an accounting reclassification of some assets to Non Current Assets Held for Sale. Available-for-sale investments, went up by 11% from P2.1 billion in September 2013 to P2.3 billion for the same period in 2014 due to purchase of corporate bonds. Other Assets increased by 37% to P640.2 million mainly due to reclassification of some accounts as described above.

Bills Payable increased by 33% to P19.02 billion in September 2014 primarily to finance business growth and the increasing volume of BLF's portfolio.

Accounts Payable, accrued expenses and other liabilities increased by P149.3 million year-on-year due to check payments pending collection by suppliers/dealers.

Lease deposits went up from P3.6 billion in September 2013 to P4.2 billion in September 2014, consistent with growth in volumes.

Stockholders' equity stood at P4.8 billion as of September 2014
